

ECONOMIC MOBILITY

2020 Whitewater Valley Snapshot

DESCRIPTION:

Investing in our partners helps individuals and families improve their socioeconomic status and be part of a thriving community

2021 ALICE Indiana report: Access to internet at home impacts ease of applying for jobs, accessing financial services and apps, and access to education. ¹

For women 25-54 years old, the most common reason for not working in 2018 was in-home responsibilities — caring for children, or for an aging parent or family member with a disability or chronic health issue. ¹

\$37,500 INVESTED

SUCCESS STORY

"NATCO Over the past few years, we have helped a gentleman named Glen. We have worked with him in a variety of ways to assist in him getting employment. Years ago, we were able to connect him to Manufacturing Matters and he successfully completed the program. We were able to provide him with interview-appropriate attire and he was able to get employment at Mosey. Unfortunately, he lost that employment when Mosey closed their doors. Since then he has been coming back to NCEC to access our computers to assist him in with his unemployment and a resume' to get a new job. This week he had an interview with what he calls a "retirement job", one he can work at until he hits retirement age. In his words, "This place (NCEC) gives you a hand at whatever you need. The tools and stuff you need to get the job done."
